Graphic Designer at the Laligurash Offset Press

Bharatpur Metropolitan City Ward No. 20 Chanauli, Chitwan, Nepal

WORK EXPERIENCE

27th April 2017 – till now

Offset Printing Machine Operators & Graphic Designer

Mr. Romnath Khanal, temporary resident of Bharatpur-20, Chanauli, Chitwan

- Developed and executed high-quality visual designs for various print and digital media, including brochures, flyers, posters, and social media graphics.
- Utilized Photoshop to create and edit images, ensuring all design elements were visually appealing and met client specifications.
- Worked with layers, masks, blending modes, and filters to achieve desired effects in image manipulation.
- Improved the quality of design output by implementing advanced Photoshop techniques, reducing production time by 80%.
- Operated and maintained offset printing machines to produce high-quality printed materials, including brochures, business cards, and packaging.
- Collaborated with the prepress team to ensure accurate transfer of digital files to printing plates.
- In your portfolio, include examples of your design work and explain your role in the printing process.

Communication skills

- When discussing a project, ask detailed questions about the client's needs, such as paper type, color preferences, print quantity, and deadlines. This ensures that you understand all the technical requirements.
- Ensure that clients understand the timeline required for high-quality offset printing, including any potential delays that might occur.
- Offset printing involves many technical aspects, such as ink types, press settings, and finishing options. Make sure to explain these in a way that's easy for the client to understand, and confirm their choices.

Job-related skills

- Adjusting designs to meet changing project requirements.
- Analysing problems and making informed design decisions.
- Understanding and interpreting client briefs accurately.
- Focusing on the most critical tasks first.

Computer skills**Adobe Photoshop:**

- Understanding how to work with text, including font selection, kerning, leading, and alignment, is crucial for creating effective designs.
- Adjustment layers like Curves, Levels, and Hue/Saturation allow you to make color and tone corrections non-destructively.
- Masks are crucial for non-destructive editing, allowing you to hide or reveal parts of a layer without permanently altering the image.
- The Pen Tool is essential for creating precise paths and shapes. It's widely used for drawing custom shapes, making selections, and creating vector masks.
- Understanding color profiles, using the Color Picker, and working with gradients are key for ensuring your designs are print-ready and consistent across different mediums.

Microsoft Office:

- Proficiency in formatting text, using styles, adjusting margins, and managing page layouts.
- Creating and modifying templates, using and applying styles for consistent formatting.
- Understanding basic to advanced formulas and functions (e.g., SUM, IF, VLOOKUP, INDEX/MATCH).

PageMaker:

- Create and apply paragraph and character styles for consistent text formatting throughout the document.
- Apply different master pages to various sections of your document for diverse layouts.
- Set up and adjust columns, margins, and gutters for multi-column layouts, like newsletters or magazines.
- Adjust kerning (space between specific character pairs) and tracking (space between groups of characters) for polished typography.
- Use CMYK color mode for print documents and add spot colors when working with specific branding requirements.
- Check for potential printing issues, such as missing fonts, low-resolution images, or color problems before sending files to print.
